

Empowering treasurers through digitalization

The corporate treasury function within enterprises of all sizes is shifting from what was by some considered a traditional cost center to a profit center able to generate incremental revenues through the efficient management of working capital while supporting the enterprise's long-term goals by becoming an efficient and innovative function.

- Understand the key risks and challenges faced by CFOs, Treasurers and Financial departments during this unprecedented crisis
- Learn how to leverage technology to enable the transformation of your company's treasury and financial functions
- Find out how Financial technology can enable your organization to focus on analysis and action rather than the gathering of data

Agenda:

- The power to know your cash
- The power to see your cash
- The power to predict your cash
- The power to move your cash
- The power to protect and grow your cash
- How to get these powers?
